HSEQ Policy

Calibre Global and its subsidiaries are committed to delivering outstanding engineering, project management, and operational support services to the resources and infrastructure industries, without compromise to the essential aspects of health, safety, quality, environment and community.

Our Policy:

Establish a safe work culture guided by Calibre's code of conduct that ensures a safe and healthy working environment, supported by systems of work and training to ensure that people hold the requisite level of knowledge to undertake their duties safely.

Ensure that our approach to service delivery and any resultant products give consideration to minimising environmental impact across the life of operation.

Delivering value to our stakeholders through the application of quality principles whilst complying with applicable legislation, regulation, codes and consideration of industry best practise.

Our Approach:

Managing Health, Safety, Environment and Quality (HSEQ) activities in accordance with international and national standards including AS/NZS ISO 9001:2008; AS/NZS ISO 14001:2004 and AS/NZS 4801:2001.

Communicating and engaging stakeholders in understanding, implementing and improving Calibre's documented approach to HSEQ management.

Defining HSEQ objectives and targets aimed at eliminating workplace injury, illness, prevention of pollution and value maximisation.

Ensuring requirements are achieved through establishing systems of work that include a robust approach to hazard and risk management and training personnel in application.

Regular auditing and review of the system for compliance and continuing suitability.

Continuous improvement through utilisation of periodic reporting, audit findings, lessons learned and customer feedback.
