

Calibre Global is an Australian-based, international provider of project management, engineering and consultancy services to the resources and infrastructure industries.

**Overview:**

With foundations in the provision of Project Delivery and Engineering Consultancy Services to major resource development projects, the group has taken its *results focused* service philosophy and diversified into complementary businesses.

Calibre Global consists of four affiliate business units - Calibre Projects, Calibre Controls, Calibre Safety Services and Calibre Rail.

Independently owned and operated, Calibre Global has grown to a workforce in excess of 750 personnel with the skills, experience and intimate knowledge of their chosen industries.

Calibre Global has offices in Perth, Adelaide and Brisbane.

## CALIBRE PROJECTS

Calibre Projects is a *results-focused* provider of Engineering, Procurement and Construction Management (EPCM) services to the mining, minerals, processing and energy industries. Calibre Projects retains technical and management personnel with the ability to deliver projects from feasibility study through to commissioning and handover.

- Project management of small to \$1b+ projects
- Pre-feasibility and feasibility studies
- Detailed multidisciplinary engineering
- Procurement and contract management
- Commissioning and start-up
- Engineering and technical service

Calibre Projects has an enviable record of high levels of repeat business from some of the largest resource companies in Australia. This attests to our success in delivering timely, cost-effective and innovative projects without compromise to the essential aspects of quality, safety, environment or workplace relations.

## CALIBRE CONTROLS

Calibre Controls is an industrial automation specialist, providing clients with 'intelligent production' control and information management solutions for optimal plant throughput and 'increased asset utilisation'.

With a primary focus on the resources and infrastructure sectors, Calibre Controls provides consultancy, design, engineering, project management, supply chain optimisation and on-going support services, with expertise in:

- MES / Production Information Systems
- SCADA / PLC and Distributed Control Systems
- Safety Instrumented Systems
- Web Enabling / Portals
- Industrial Communications & IT
- Communications
- CCTV / Access Control
- Instrumentation
- Condition Monitoring
- Remote Operations Infrastructure

## CALIBRE SAFETY SERVICES

Calibre Safety Services provides specialist Safety and Training Services to the resource, construction and manufacturing industries, with a primary goal to help clients reduce their incident rates and meet their statutory obligations.

Key areas of expertise include:

- Specialist training service (including working with height and confined space)
- Safety consultation
- Safety inspections
- Management and supervisor training
- Provision of safety personnel for project deployment
- Safety audits
- Risk management
- OS&H policy development

## CALIBRE RAIL

Calibre Rail is a leading provider of rail engineering, project management and operational support services to the resources and transport industries.

Experts in delivering technically and logistically challenging rail projects, Calibre Rail has established itself as Australia's industry leader in delivering heavy haulage rail projects.

Calibre Rail has been involved in major rail projects in the Western Australian Pilbara region, taking many projects from concept through to construction and handover.
