

## Rio Tinto Alcan Project

### PROJECT LOCATION

Weipa, Far North Queensland

### PROJECT CLIENT

Rio Tinto Alcan

### PROJECT SUMMARY

Rio Tinto's Alcan asset (RTA) based in Weipa, has engaged Calibre Projects (Brisbane) to undertake Brisbane-based and onsite design drafting and engineering for small to medium-sized sustaining capital projects and feasibility studies.

Calibre commenced both the onsite and Brisbane-based support in April 2008 once RTA finalised evaluation of their project pipeline for sustaining projects.

Calibre's value-added project and engineering management support will provide RTA's onsite owner's team with resources to effectively deliver their sustaining projects. These include conveyor guarding redesign, shiploader structural modifications, 3D drafting upgrades and training and various onsite mechanical, civil, structural and electrical infrastructure projects.

### ABOUT CALIBRE PROJECTS

Calibre Projects is a results-focused engineering consultancy providing engineering, procurement and construction management services to the resources industry.
