

The successful delivery of any project rests with the combined abilities of the right project team, appropriate technologies and management systems.

**Overview:**

Calibre Projects is a results focused provider of Engineering, Procurement, Construction Management (EPCM) services to the mining, minerals, processing and energy industries.

We provide a full suite of services to assist our clients in the various stages of their resource assets lifecycle - Feasibility Studies, EPCM Project Delivery, Engineering and Technical Service, Project Management Services and Project Controls.

### Areas of Expertise:

We have grown to a workforce in excess of 500 consisting of engineering, technical and management personnel with the ability to deliver projects from feasibility study through to commissioning and handover.

- Project Management of small to \$1B projects
- Pre-feasibility and Feasibility Studies
- Detailed Multidisciplinary Engineering
- Procurement and Contract Management
- Commissioning and Startup.

### Adding Value and Building Relationships:

We are committed to delivering exceptional service in all areas of our business to ensure value-adding outcomes for our clients.

We have an enviable record of high levels of repeat business from some of the largest resource companies in the world. This attests to our success in delivering timely, cost-effective and innovative projects without compromise to the essential aspects of quality, safety, environment or workplace relations.

### We bring to our clients:

- A history of achieving successful outcomes
- A singular focus on adding value to your business
- An experienced team with skills across the Mining, Minerals and Energy industries
- Strong, well-proven management systems and project delivery techniques
- A determination to consistently achieve exceptional health, safety and environmental goals
- A motivated team with a culture that is open, frank and honest.

Our approach to minimising costs through the engineering and construction process is founded on the belief that value is built into a project, not added later.

Calibre Projects is a strong provider of EPCM services for major resource development projects. In collaboration with our clients, we build on our strengths and deliver results which ensures success for all stakeholders.
