

Calibre Rail is a leading provider of rail engineering, project management and operational support services to the resources and transport industries.

Overview:

We work closely with our clients at every stage of the project to better understand the issues and deliver the right outcome.

We deliver the most complex rail projects from initial inception to a fully operational system and ongoing technical support.

From feasibility and concept to commissioning, we constantly provide our clients with the service that gives them the confidence that their projects will be delivered to their requirements.

Capabilities:

At Calibre Rail, we are committed to exceptional performance in every aspect of our projects. Through our personnel, experience, proven management systems and cost control we provide cost effective solutions without compromising on quality. We are experts in the delivery of rail transport solutions and the range of services we provide demonstrates our skills and expertise:

Engineering

Railway Engineering, Earthworks and Drainage, Structural, Electrical Design, Signalling Design, Communications.

Project Services

Contracts Management, Program Management, Document Control, Program Management, Cost Estimating and Control, Railway Engineering and Technology, QA/QC, Procurement Controls, Railway Strategy and Master Planning.

Construction

Construction Management, Operational Interface Management, Commissioning, Safety Management.

Management

Project Management, Feasibility Studies, Risk Management, Environmental Studies, Training, Project Study Leadership, Occupational Safety & Health, Design Management.

Our Value:

Offering a full range of railway engineering, procurement and construction management (EPCM) services, the value of our service is in our approach and expertise.

A successful project is not just in the design and construction, it is the attention to detail, thorough planning and understanding of inter-relationship of all the project elements and their impacts. This understanding only comes with the experience of delivering projects from start to finish.

With over 250 rail specialists, and as one of the fastest growing privately owned companies in Australia, our rapid growth over the past two years reflects our success in delivering results that exceed expectations.
