

Occupational Safety, Health and Training Services tailored to meet the specific needs of our clients.

Safety and Rescue Australia is a leader in training and assessment services in its specialist area of safety and rescue, incorporating and implementing best practice principles coupled with expertise and experience gained from real industry involvement.

#### Overview:

The reasons for embracing safety in the workplace are compelling - less production downtime, reduced claims and insurance premiums, government compliance, higher employee motivation, healthier profits and most importantly - saving lives.

For over 20 years, Safety and Rescue Australia Pty Ltd (SRA) has been delivering specialist Safety & Training Services to the resource, construction and manufacturing industries.

Our goal always is to help our clients to reduce their incident rates, meet their statutory obligations and help create a safer workplace.

#### Areas of Expertise:

We offer qualified and experienced Safety and Training Professionals to provide services of excellence in the following fields:

- Safety consultation
